WHEREVER THERE IS GLASS, WE CAN *improve* IT.

Installing Madico Window Film is a very smart move for your building, your business and your bottom line.

Madico Window Films:

- ✦ Optimize building efficiency
- ✦ Increase occupant comfort
- ✦ Control fading of furnishings
- ✦ Improve exterior aesthetics
- ✦ Augment glass safety

Reduce energy costs.

Madico window films reject solar heat and block over 99% of damaging ultraviolet rays. In summer, our films reject up to 80% of the sun's solar energy, helping to reduce air conditioning costs. In the winter, the same film helps retain interior warmth. Wherever you are, whatever your climate, Madico window films can save you money.

Increase comfort and productivity.

Madico window films create a more comfortable working environment through consistent climate control. By eliminating "cold wall" and "hot wall" problems, window films help offices stay cooler in summer and warmer in the winter, no matter where the sun is shining. As a result, office efficiency is increased.

Improve aesthetics inside and out.

Window film improves aesthetics from the outside while helping protect interior furnishings from fading on the inside. It also provides a sleek, uniform look to a building's exterior, eliminating visual clutter and adding value to your investment.

Consult your Madico dealer today!

Madico offers a wide range of films, tested and proven in thousands of installations around the world. All Madico window films are scratch-resistant, long-lasting and backed by a strong manufacturers warranty. Our worldwide network of dealers will help you determine which film is best for your building. Be sure to ask your dealer about anti-graffiti film and solar control films specially designed for safety and security.

Madico window films are used on the most beautiful buildings around the world while helping protect occupants and contents from potential injury and damage.
